

Sherman Elementary School has experienced many changes and accomplishments. Some areas of accomplishment during this past school year include:

- Completion of our new construction and remodeling, including a fully air conditioned building, new cafeteria, two art rooms, two music rooms, a computer lab, and twelve additional classrooms.
- Placement of the fourth and fifth grades in the elementary building in Sherman, providing more continuity to the K-5 program. Continued growth on the ISAT scores for third and fifth grades.
- Continued parent involvement as classroom volunteers.

Areas of priority as we focus and plan on the future of Sherman Elementary School:

- Provide additional resources in the writing curriculum to take students from the “below meets” category to a “meets” or “exceeds” on the ISAT scores.
- Expand the fourth and fifth grade library selections with appropriate reading materials to enhance the literary curriculum and the Accelerated Reading Program.
- Review the remedial and special education programs to ensure that learning opportunities and growth are available for all students.
- Explore the summer school program to determine possible classes for not only review but also for enrichment.
- Assess playground safety issues.
