

Williamsville High School continues to be a great place for students to learn and grow.

Some areas of success include:

- Improvement in PSAE Math scores for the second straight year since the implementation of our new Math Curriculum.
- Staff technology training resulting in enhancements in the delivery of instruction and teaching methods, utilizing technology as teaching tool.
- Implementation of our revised and expanded Fine Arts Curriculum.

Some areas of focus for the future include:

- It is our goal to revisit our Social Studies Curriculum this year, with emphasis on revising and updating the content and teaching materials used within the curriculum.
- It is our goal to provide better on-line access for parents to follow their student's curriculum, assignments, and academic progress, as well as school activities and events. This will include piloting the EdLine program which will give parents the opportunity to access student grades and other class information on-line.
- It is our goal to examine the WHS facilities and available classroom space in the light of our growing student population and make recommendations for the future.
